

JEMOPROT Powder

Dietary Supplement a source of protein fortified with calcium, vitamin D and vitamin C.

Product Description:

- **JEMOPROT Sachets provide calories, protein & carbohydrates to help gain or maintain a healthy weight.**
- **JEMOPROT sachets are a complete and balanced drink, in powder form.**
- **Improves the body's ability to cope with pressure and stress.**
- **Enhances and strengthens the immune system's ability to confront infection.**
- **Provides the body's energy needs and essential elements.**
- **Supports muscles and bones and enhances their health.**
- **JEMOPROT is made with skimmed milk powder, sugar, whey protein concentrate, maltodextrin, calcium caseinate, natural vanilla powder, calcium carbonate, ascorbic acid (vitamin C), cholecalciferol (vitamin D3).**
- **Whey Protein: A protein extracted from milk and it is one of the best food sources of high-quality protein. It is also easy to digest and absorbed quickly compared to other proteins. It is also rich in amino acids that contribute to improving muscle growth and weight gain; Combined with resistance exercise, whey protein supports an increase in muscular strength. Whey protein improves exercise performance.**
- **Casein: One of the slow-digesting proteins extracted from milk, it provides the body with many amino acids necessary for muscle building. Slower absorbing protein source to deliver essential amino acids to muscles for exercise recovery Post-exercise consumption supports muscle anabolism.**
- **Calcium: contributes to normal blood clotting, normal energy-yielding metabolism, normal muscle function, normal neurotransmission, the normal function of digestive enzymes, has a role in the process of cell division and specialization, is needed for the maintenance of normal bones, and is needed for the maintenance of normal teeth.**
- **Vitamin C: It enhances the body's production of collagen, boosts immunity, and maintains healthy gums and skin.**

- **Vitamin D3:** It works to maintain a balance in calcium and phosphorus levels to ensure healthy and strong bones. Is needed for the normal and proper function of the thyroid. Vitamin D is needed for the proper regulation of blood calcium levels. Has long been known to aid in calcium absorption, but new research shows that D3 also plays a role in cardiovascular function and supports a healthy inflammatory response. Vitamin D3 has long been known to aid in calcium absorption.
