

SESTAROK Sachets

Support respiratory function

Product Description:

- Dietary supplement that contributes to normal respiratory system function.
- SESTAROK Sachets new enhanced formula. One sachet per day.
- SESTAROK is useful for the wellbeing of the respiratory tract. Your ally for the well-being of the respiratory tract.
- SESTAROK is a food supplement that is formed of N – acetylcysteine, Echinacea purpurea and L – ascorbic acid.
- N-acetylcysteine: is an antioxidant and glutathione inducer indicated for mucolytic therapy. It can be used as a mucolytic in patients with certain lung conditions, a precursor of, among other things, glutathione. N-acetyl cysteine is an antioxidant that might play a role in preventing cancer; it's used by healthcare providers to treat acetaminophen (Tylenol) poisoning. It works by binding the poisonous forms of acetaminophen that are formed in the liver. People commonly use N-acetyl cysteine for coughs and other lung conditions. It is also used for flu, dry eye, and many other conditions. is used to treat paracetamol overdose and to loosen thick mucus in individuals with chronic bronchopulmonary disorders like pneumonia and bronchitis.
- Echinacea purpurea: is useful for promoting the body's natural defenses and the functionality of the respiratory tract.
- L-ascorbic acid: (Vitamin C): contributes to the normal function of the immune system and helps reduce tiredness and fatigue, and after intense physical exercise, normal energy-yielding metabolism, the protection of cells from oxidative stress.

Why use the “SESTAROK ”
